YOUR NEXT LESSON STARTS HERE

01 Open your course

Open the offline HTML course in a browser on your computer. Keep the course file so you can return to it.

02 Choose and read

Choose a chapter, then a numbered lesson. Read the text and monochrome diagrams. Adjust text size if needed.

03 Try the questions

Choose answers for interactive practice where provided. Write longer answers in a notebook. Ask a teacher or facilitator for help.

04 Keep your progress

Mark lessons complete. Resume using the same browser profile. Export a progress backup regularly, because browser storage can be cleared.

For facilitators: check content and language before use. This guide describes the existing computer reader. Physical device controls remain under development.
