ASTAR

LEARNING WHEN INFRASTRUCTURE FAILS

WHEN INFRASTRUCTURE FAILS

01 / POWER

Charging becomes uncertain

02 / CONNECTIVITY

Online lessons become harder to reach

03 / CONTINUITY

Students need a dependable fallback

ASTAR is designed to complement teachers and education services when access is disrupted.

INTRODUCING ASTAR

DEVICE

Proposed low-power solar hardware

SOFTWARE

Offline reading, practice and progress

FORGE

Content preparation, review and export

THE PRODUCT
CONCEPT

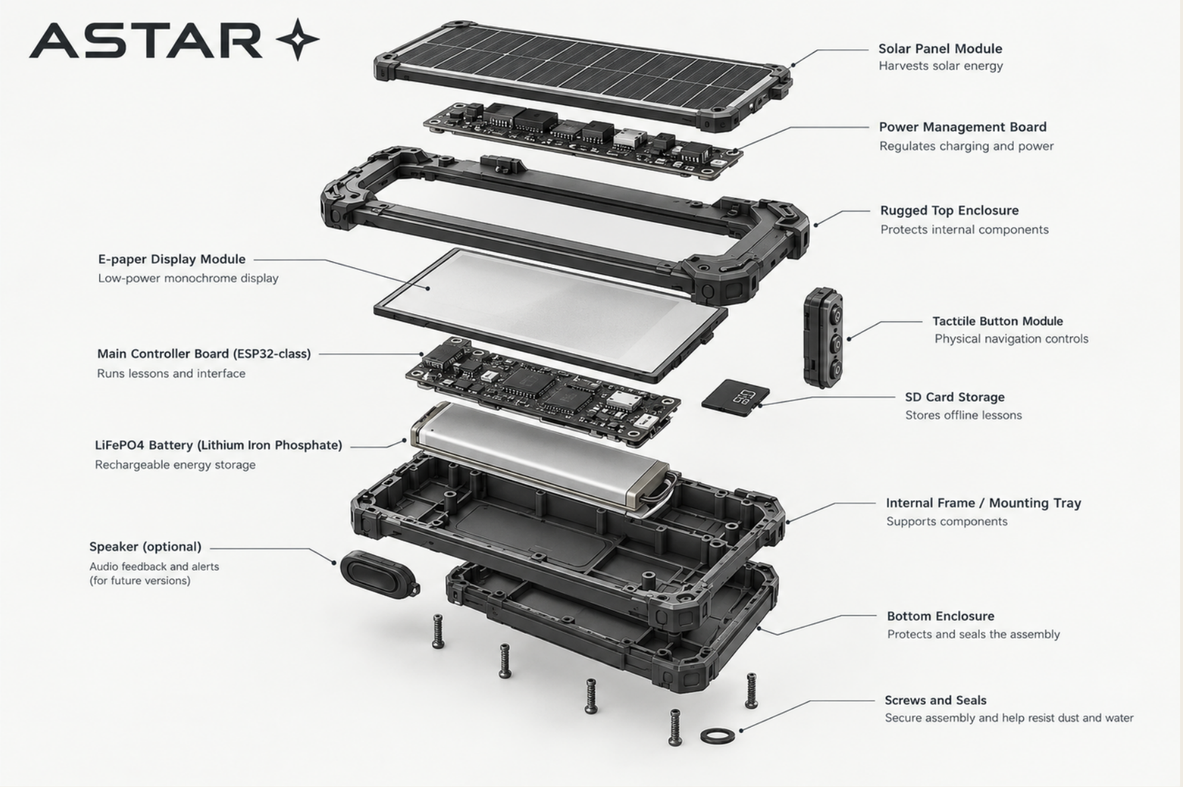

E-paper reading. Physical controls. Local storage. Solar charging.

DESIGN CONCEPT / SUBJECT TO VALIDATION

DESIGNED AS A SYSTEM

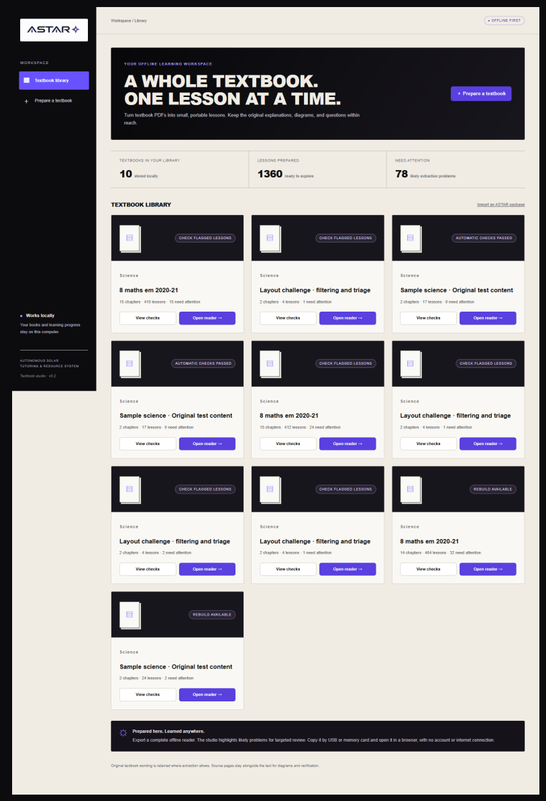

An intended modular architecture for learning continuity.

DESIGN CONCEPT / SUBJECT TO VALIDATION

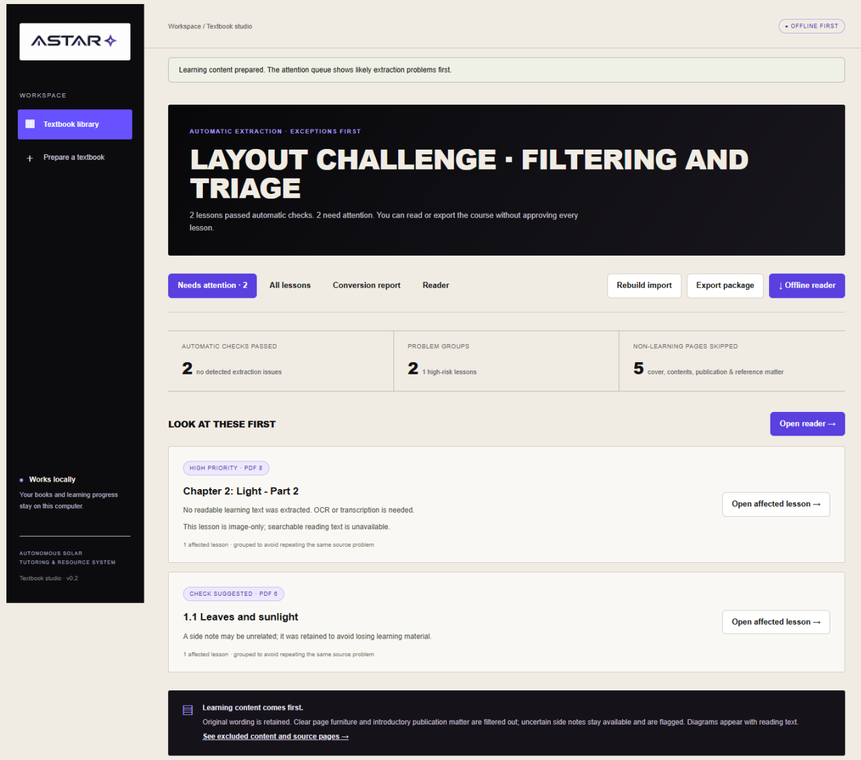

A WHOLE TEXTBOOK.
ONE LESSON AT A TIME.

Prepare material locally, then
export an offline course.

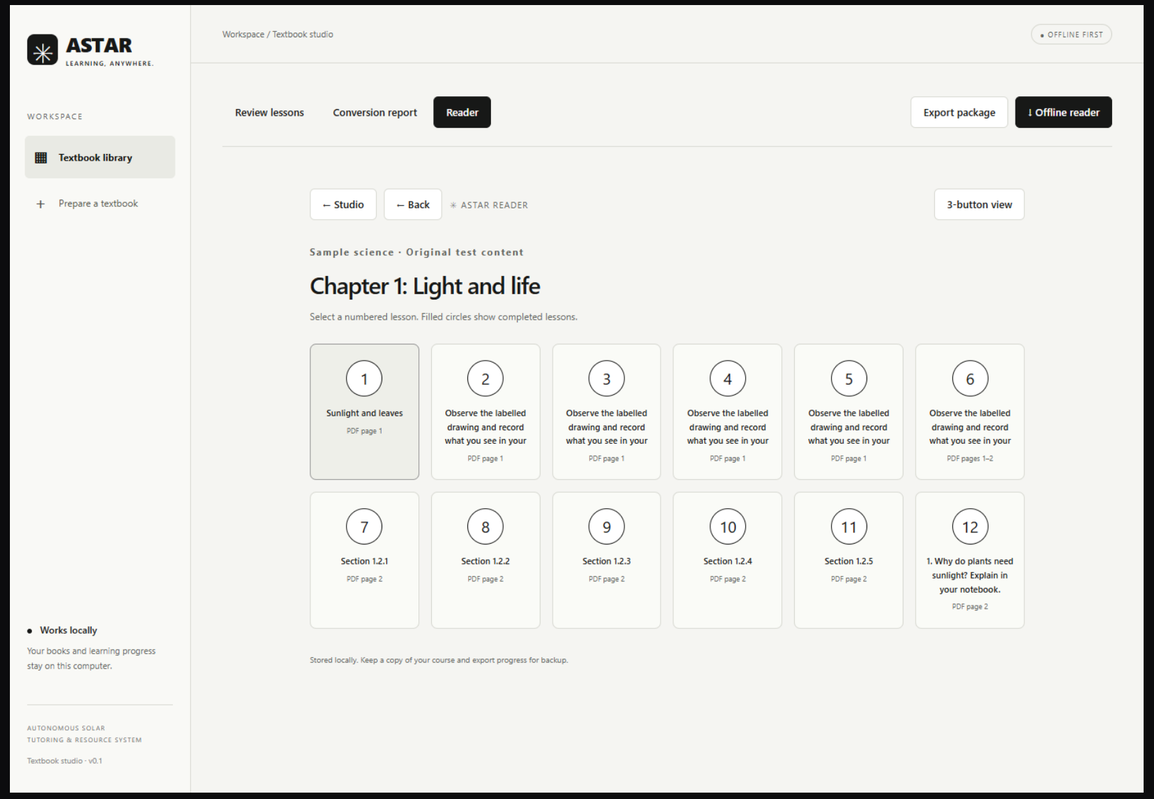

REVIEW WHAT NEEDS ATTENTION

Ranked conversion checks. Source-page comparison. An exclusion log.

READ. PRACTISE. KEEP LEARNING.

Numbered navigation, monochrome lessons and locally saved progress.

WHO IS ASTAR FOR?

LEARNERS

Students aged 10-18 in disrupted or underserved settings

DEPLOYMENT

Education organisations and institutional pilots

SUPPORT

Facilitators, reviewed content and local updates

A TARGET PRICE TO VALIDATE

INR 3,700

Founder target unit cost

INR 4,700

Founder target selling price

Unvalidated estimates. Confirm components, battery, charging, testing, logistics and support costs.

THE NEXT MILESTONE

01 / HARDWARE

Measure power use and charging performance

02 / CONTENT

Review a small teaching package

03 / PILOT

Test with learners and refine deployment

LEARNING SHOULD CONTINUE.

Seeking technical mentors and education collaborators.
